The Data Services unit collects, analyses, and publishes data relating to a wide range of aspects of the Church of England including:

- Church attendance

- Parish finances

- Ministry

- Cathedral attendance

- College chapel attendance

We use data from the national census and other government statistics to provide parish-level information for the Church of England's 12,500 parishes.

We provide an interactive Church of England parish map, with summary deprivation and census statistics mapped onto parish boundaries. The map also shows parish, benefice, deanery, archdeaconry, diocese, and lower super output area (LSOA) boundaries, and school locations.

Map updated January 2024. Next planned update, summer 2024.

To explore this map further click here

A user guide for working with the interactive parish map is available. Parish deprivation data can be explored in more detail in the Church

Urban Fund's poverty lookup tool.

Key areas of research

Church attendance statistics

Attendance and numbers of baptisms, marriages, and funerals

Parish finance statistics

Annual finance information as reported by parishes

Ministry statistics

[Licensed ministers in the Church of England](#)

Cathedral attendance statistics

[Attendance and activities at the Church of England's Cathedrals](#)

Resources and conferences

Resources, publications, and data

Parish census and deprivation data and historical publications

Faith in Research

Annual conference sharing and discussing current Christian research.
