

Can you help us improve the data we hold on renewables?

We are conscious that some of the information held on our [renewables map](#) on the Church Heritage Record is out of date. It should show all the churches with solar panels, heat pumps, biomass boilers and other renewable energy installations,

If your church has one of these, can you please use the form below to provide us with updated information, and we will make the changes needed.

Thank you!

Name

Email Address

Diocese
